Order Instituting Rulemaking to Develop  
Additional Methods to Implement the California  
Renewables Portfolio Standard Program.

Rulemaking 06-02-012  
(Filed February 16, 2006)

**NOTICE OF EX PARTE COMMUNICATION**

Pursuant to Rule 8.3 of the Rules of Practice and Procedure of the California Public Utilities Commission, the Large-Scale Solar Association<sup>1</sup> (LSA) submits this notice.

On December 2, 2008, Shannon Eddy, LSA, Evelyn Kahl, counsel to First Solar, Greg Blue, Optisolar Inc, and Arthur Haubenstock, Bright Source Energy Inc. (together “Solar Representatives”) had the following meetings: Traci Bone and Theresa Cho advisors to Commissioner Grueneich from approximately 9:15 to 9:45, Nancy Ryan, advisor to President Peevey, from 10:00 to 10:30, Jane Whang, advisor to Commissioner Chong, from 10:45 to 11:15 and Robert Kinosian, advisor to Commissioner Bohn, from 11:30 to 12:00. All meetings were held at the Commission’s office in San Francisco and were initiated by LSA.

The Solar Representatives requested that the Commission undertake further consideration of the appropriate use of TRECs for RPS compliance. They stated that the proposed TREC program would provide compliance flexibility to the utilities, but would not deliver the full range of intended benefits of the RPS to ratepayers. The Solar

Representatives observed that the legislative intent underlying the RPS contemplates not only the delivery of renewable power *to* California, but the consumption of the power *in* California, a point not fully recognized by the proposed decision. They further observed that while the proposed TREC program could in some circumstances deliver GHG benefits, the program would forego other intended local RPS benefits, such as new jobs, investment in the State, tax revenues and air quality co-benefits. The proposed decision's focus on the untested potential for TRECs to lower costs to consumers thus requires broadening to ensure that the TREC program would deliver all of the benefits contemplated by the Legislature.

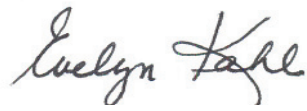

For these reasons, the Solar Representatives urged refinement of the PD in two ways. First, the IOUs should be permitted to use TRECs to meet the existing 20 percent RPS requirement only if the energy associated with the TREC is consumed in California; further consideration should be given to appropriate limitations on TRECs to meet future RPS requirements above 20 percent. Second, utilities should be required, as contemplated in the Staff's Revised Straw Proposal, to meet a long-term bundled contract quota in conjunction with the use of short-term TRECs for compliance. Solar Representatives highlighted the proposal by the Union of Concerned Scientists, which proposed that .75 % of each annual increase in RPS compliance be met with long-term bundled contracts before short-term TRECs could be used.

Handouts were not provided.
